Why the Common Core?
How these Standards are Different

Presenter: Moseka Medlock
Common Core Success Coach
Thurgood Marshall College Fund
AGREEMENTS

• Be open minded and respectful of all ideas
• Participate fully
• Work collaboratively with your groups
• Learn, reflect, implement and HAVE FUN!
• Limit comments to 1 minute (or less)
• Utilize the parking lot as needed
WORD SCRAMBLE COMPETITION

When I say go…

- Turn over your paper and complete every item as quickly as you can
- Stand when you are finished
- The people who finish fastest with all correct answers win!
Discussion questions

• What are your thoughts about the fairness of the competition?
• How would you construct the competition to make it more fair?
• What correlations can you make between this competition and the Common Core State Standards?
K-W-L

• **K**- What do you know about the Common Core State Standards?

• **W**- What do you want to know about the Common Core State Standards?

• **L**- What have you learned about the Common Core State Standards?
Background of the Common Core

Initiated by the National Governors Association (NGA) and Council of Chief State School Officers (CCSSO) with the following design principles:

• Result in College and Career Readiness
• Based on solid research and practice evidence
• Fewer, clearer, and higher
How did CCSS emerge?

- State led initiative
- National Governors Association and Council of Chief School State Officers collaborated to create CCSS
- Took best of state standards and internationally benchmarked them
  - 2009 College and Career Anchor Standards released
  - 2010 CCSS released
- Not national standards
- Different states are at different levels of implementation.
Why were these standards created?

Before Common Core State Standards we had standards, but rarely did we have standards-based instruction.

✓ Long lists of broad, vague statements
✓ Mysterious assessments
✓ Coverage mentality
✓ Focused on teacher behaviors – “the inputs”
Results

Previous state standards did not improve student achievement.

✓ Gaps in achievement
✓ Gaps in expectations
✓ NAEP results
✓ ACT 2012 data – College Readiness Benchmark
  All 4 subject areas: 25%
✓ College remediation rates
Principles of the CCSS

- Fewer - Clearer - Higher

- Aligned to requirements for college and career readiness
- Based on evidence
- Honest about time
What are our expectations?

Based on the beliefs that

• A quality education is a key factor in providing all children with opportunities for their future

• It is not enough to simply complete school, or receive a credential – students need critical knowledge and skills

• This is not a 12\textsuperscript{th} grade or high school issue. It is an education system issue.

Quality implementation of the Common Core State Standards is a necessary condition for providing all students with the opportunities to be successful after high school.
Name the standards

• Read the Standards for Literacy in History/Social Studies and Technical Subjects

• “Name” each standard with a 1-5 word phrase

• First individually (10 min)…table talk…share out
Diving into the Content Area

Literacy Shifts-

Introduction
ELA/Literacy: 3 shifts

1. **Building knowledge** through **content-rich nonfiction**

2. Reading, writing, and speaking grounded in **evidence from text**, both literary and informational

3. Regular practice with **complex text** and its **academic language**
Shift #1: Building Knowledge Through Content-Rich Nonfiction
Building Knowledge Through Content-rich Nonfiction – Why?

• Students are required to read very little informational text in elementary and middle school.

• Non-fiction makes up the vast majority of required reading in college/workplace.

• Informational text is harder for students to comprehend than narrative text.

• Supports students learning how to read different types of informational text.
Distribution of Literacy and Informational Texts

Distribution of Literary and Informational Passages by Grade in the 2009 NAEP Reading Framework

<table>
<thead>
<tr>

<td>12</td>
<td>30%</td>
<td>70%</td>
</tr>
</tbody>
</table>

• “The grades 6–12 standards are divided into two sections, one for ELA and the other for history/social studies, science, and technical subjects. This division reflects the unique, time-honored place of ELA teachers in developing students’ literacy skills while at the same time recognizing that teachers in other areas must have a role in this development as well.”

From the Common Core State Standards for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects, page 4.
research shows students need to be proficient in reading complex informational texts, independently, in a variety of content areas in order to be college and career ready.

Most of the required reading in college and workforce training programs is informational in structure and challenging in content.

Postsecondary education programs typically provide students with both a higher volume of such reading than is generally required in K–12 schools and comparatively little scaffolding.

The 2009 reading framework of the National Assessment of Educational Progress (NAEP) requires a high and increasing proportion of informational text on its assessment as students advance through the grades.
Shift #2: Reading, Writing and Speaking Grounded in Evidence From Text, Both Literary and Informational
Reading, Writing and Speaking Grounded in Evidence from Text: Why?

• Most college and workplace writing requires evidence.
• Ability to cite evidence differentiates strong from weak student performance on NAEP.
• Being able to locate and deploy evidence are hallmarks of strong readers and writers.
James Watson used time away from his laboratory and a set of models similar to preschool toys to help him solve the puzzle of DNA. In an essay discuss how play and relaxation help promote clear thinking and problem solving.
Sample Assessment Question for Informational Text:

**Pre-Common Core State Standards**

- High school students read an excerpt of James D. Watson’s *The Double Helix* and respond to the following:
  
  James Watson used time away from his laboratory and a set of models similar to preschool toys to help him solve the puzzle of DNA. In an essay discuss how play and relaxation help promote clear thinking and problem solving.

**Common Core State Standards**

- High school students read an excerpt of James D. Watson’s *The Double Helix* and respond to the following:
  
  By the end of this article, James Watson felt that "the answer to everything was in our hands."

  What was the answer? What problem was Watson trying to solve? What steps or process did he use to discover the answer? What mistakes did he make along the way to his discovery? What was his response to this mistake?
Shift #3: Regular Practice with Complex Text and Its Academic Language
Regular Practice With Complex text and Its Academic Language: Why?

- Gap between complexity of college and high school texts is huge.

- What students can read, in terms of complexity, is greatest predictor of success in college (2006 ACT study).

- Too many students are reading at too low a level.

- Standards include a staircase of increasing text complexity from elementary through high school.

- Standards also focus on building general academic vocabulary so critical to comprehension.
Determining Text Complexity

Measuring Text Complexity: Three Factors

**Qualitative evaluation of the text:** Levels of meaning, structure, language conventionality and clarity, and knowledge demands

**Quantitative evaluation of the text:** Readability measures and other scores of text complexity

**Matching reader to text and task:** Reader variables (such as motivation, knowledge, and experiences) and task variables (such as purpose and the complexity generated by the task assigned and the questions posed)

**Note:** More detailed information on text complexity and how it is measured is contained in Appendix A.
Centripetal force and centrifugal force, action-reaction force pair associated with circular motion. According to Newton's first law of motion, a moving body travels along a straight path with constant speed (i.e., has constant velocity) unless it is acted on by an outside force. For circular motion to occur there must be a constant force acting on a body, pushing it toward the center of the circular path. This force is the centripetal (center-seeking) force. For a planet orbiting the sun, the force is gravitational; for an object twirled on a string, the force is mechanical; for an electron orbiting an atom, it is electrical. The magnitude F of the centripetal force is equal to the mass m of the body times its velocity squared v² divided by the radius r of its path: F=mv²/r. According to Newton's third law of motion, for every action there is an equal and opposite reaction. The centripetal force, the action, is balanced by a reaction force, the centrifugal (center-fleeing) force. The two forces are equal in magnitude and opposite in direction. The centrifugal force does not act on the body in motion; the only force acting on the body in motion is the centripetal force. The centrifugal force acts on the source of the centripetal force to displace it radially from the center of the path. Thus, in twirling a mass on a string, the centripetal force transmitted by the string pulls in on the mass to keep it in its circular path, while the centrifugal force transmitted by the string pulls outward on its point of attachment at the center of the path.
What are the Qualitative Features of Complex Text?

- Subtle and/or frequent transitions
- Multiple and/or subtle themes and purposes
- Density of information
- Unfamiliar settings, topics or events
- Lack of repetition, overlap or similarity in words and sentences
- Complex sentences
- Uncommon vocabulary
- Lack of words, sentences or paragraphs that review or pull things together for the student
- Longer paragraphs
- Any text structure which is less narrative and/or mixes structures
Scaffolds for Reading Complex Text

- Chunking
- Annotation
- Reading and rereading
- Read aloud
- Strategic think aloud
- Heterogeneous small groups
- Recording
- Pre-prepping struggling readers to support confidence and participation
- Paraphrasing and journaling
- Note taking
Close Analytic Reading

• Requires prompting students with text-dependent questions to unpack complex text and gain knowledge.
• Text dependent questions require text-based answers – evidence.
• Not teacher summarizing text, but guiding students through the text for information.
• Virtually every standard is activated during the course of every close analytic reading exemplar through the use of text dependent questions.
• Supports fluency
Sample: Quick Annotation Strategy

- ? = Ask a question
  - “The text mentions a the DNA study. What does DNA stand for?”
  - 

- !!! = Note an interesting passage
  - “I didn’t realize that tapeworms can grow to 23 meters!”
  - 

- C = connection to another text or piece of evidence
  - “The Ebola virus is like the AIDS virus we read about yesterday because....”
  - 

- (check)= Access prior knowledge; I already knew that!
  - “I knew that photosynthesis required water.”
  - 

- X = Challenge your own thinking, new information
  - “I had no idea that Nobel invented dynamite.”
  - 

- * = Reason that looks important
  - “I’ll need this piece of evidence about Triceratops to support my thesis.”
  - 

- "Box it" = Remember words you don't know, are repeated, or you just like
  - “I’ve seen the word ignominious several times, and I need to look it up.”
ELA/Literacy Shifts in action

http://www.youtube.com/watch?v=xV3rYB79lcU

Activity: Create your own Venn

- Compare and contrast two classrooms in the videos
- Share notes and discuss
- Create your own Venn diagram using hula hoops, index cards and markers/pens
Shifts Mean a Change in Practice!

• From...
  • Content knowledge *primarily from teacher-led lecture*

• To...
  • Content knowledge comes from a *balance of reading, writing lecture, and hands-on experience*
A closer look at
Text Dependent Questions…
Text-Dependent Questions are not…

- Low-level, literal, or recall questions
- Focused on comprehension strategies
- Just questions…
Text-Dependent Questions...

• Can *only* be answered with evidence from the text.

• Can be literal (checking for understanding) but must also involve analysis, synthesis, evaluation.

• Focus on word, sentence, and paragraph, as well as larger ideas, themes, or events.

• Focus on difficult portions of text in order to enhance reading proficiency.

• Can also include prompts for writing and discussion questions.
Global Warming Article
# Non-Examples and Examples

## Not Text-Dependent

1. In the article “Global Warming” why do you think they used the picture of the polar bear?

2. Why is global warming a problem?

3. The article “Global Warming” they discuss greenhouse gases. What are greenhouse gases?

## Text-Dependent

1. After reading the article “Global Warming” explain how the polar bear picture is representation of the concept of global warming?

2. What changes in the Earth’s ecosystem are directly effected by global warming and how do these changes interact with each other to alter the overall ecosystem?

3. How does human activity effect greenhouse gases and in turn effect overall global warming?
When writing or reviewing a set of questions, consider the following three categories:

• Questions that assess themes and central ideas
• Questions that assess knowledge of vocabulary
• Questions that assess syntax and structure
Creating Text-Dependent Questions

Step 1: Identify the core understandings and key ideas of the text.

Step 2: Start small to build confidence.

Step 3: Target vocabulary and text structure.

Step 4: Tackle tough sections head-on.

Step 5: Create coherent sequences of text-dependent questions.

Step 6: Identify the standards that are being addressed.

Step 7: Create the culminating assessment.
“Text Dependent Questions” Activity
TDQ- Activity Instructions

• Read “Sexual Reproduction in Flowering Plants”
• Evaluate questions using:
  ✓“Checklist for Evaluating Question Quality”
  ✓6-8 Literacy standards for Science [www.corestandards.org](http://www.corestandards.org)
  ✓Bloom’s Taxonomy
• Discuss checklist with your group
• Explain what changes you would make to the set of questions to make them TDQ
Summary Activity: Word Sort

- Use items from bags for this activity
- Place sentence strips with categories written on them on the wall
- Sort through typed words/phrases and place them under the category to which they belong
